INSTALLATION INSTRUCTIONS

Remote Surface Mount Power Box (RSMx)

1

Power must be disconnected prior installing power box. Remove 4 screws to take cover (A) off of power box.

2

Determine which knockout/location the wires will exit the power box, and punch out material. Mount the power box to structure with 4 screws as shown (hardware provided by others). For power cord applications, skip to step 5

3

For conduit application: Run conduit (provided by others) from selected knockout location (B) to single gang junction box where fixture is to be mounted (fittings provided by others). Route cables through conduit to junction box.

4

For power cord application: Run power cord to fixture. Connect wires to the driver (C). Power cord includes strain relief.

5

Connect power box to building mains. Place cover (A) back on power box, and fasten with 4 screws.
